

DHRUVA

BUILDING SOLUTIONS PVT LTD.

As Steady as **DHRUVA**. As **STRONG AS STEEL**

Dhruva Building Solutions Pvt Ltd. is professionally managed company with the commitment for offering advanced Pre-Engineered Building (PEB) solutions, delivering high-performance steel structures for warehouses, factories, commercial complexes, and infrastructure projects.

Inspired by the meaning of “Dhruva” the symbol of stability and steadfastness — we are committed to engineering structures that stand strong, efficient, and future-ready.

About Us

Dhruva Building Solutions Pvt Ltd. specializes in designing and delivering advanced Pre-Engineered Steel Buildings that redefine efficiency, durability, and construction speed.

Our integrated approach ensures seamless coordination from initial concept to final handover. By combining modern design software, precision fabrication processes, and experienced project management, we guarantee high-quality outcomes that meet global construction standards.

We believe that every structure must reflect structural integrity, operational efficiency, and long-term value.

With a strong foundation in structural engineering excellence, we serve diverse sectors including :

- Rice Mills
- Warehouses / Godowns
- Manufacturing Units & Factories
- Commercial Complexes
- Infrastructure Projects
- Logistics & Distribution Centres

Our Services

Pre-Engineered Building (PEB) Solutions

Customized steel structures designed for strength, speed, and scalability.

Structural Design & Engineering

Optimized structural analysis ensuring safety and cost efficiency.

Manufacturing & Fabrication

Precision fabrication using advanced machinery and quality-controlled processes.

Project Management & Erection

Timely on-site execution with strict safety and quality compliance.

Why PEB?

Faster Construction Time :

Components are prefabricated in a factory and assembled on-site, reducing project timelines from months to weeks.

Cost- Effectiveness :

Reduce labour costs, faster construction and minimized on-site wastage lead to overall lower capital investment.

Structural Durability :

Constructed with high grade steel, PEBs are engineered to last 40-70+ years and withstand harsh weather conditions, including high winds and seismic loads.

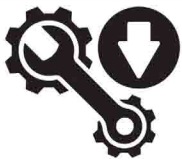

Unmatched Customization :

Designs can be tailored to specific requirements, including large, clear-span spaces without intermediate columns, which is ideal for industrial or manufacturing needs.

Easy Expansion and flexibility :

PEB structures allow for future, easy expansion, making them ideal for growing businesses.

Low maintenance :

Unlike concrete, steel structures require minimal maintenance and do not easily corrode, providing long term value.

Sustainability :

Steel is 100% recyclable, and PEB construction generates less waste, aligning with green building practices.

Why Choose DHRUVA Building Solutions Pvt Ltd.?

- ✓ Precision-Engineered Designs
- ✓ Faster Project Completion
- ✓ Cost-Effective Construction
- ✓ High Structural Durability
- ✓ Customizable & Scalable Solutions
- ✓ Commitment to Quality & Safety

Vision, Mission & Core Values

Our Vision

To become a leading force in the pre-engineered building industry by delivering innovative, sustainable, and future-ready steel structures that support industrial and commercial growth.

Our Mission

To provide high-quality, cost-efficient, and structurally sound building solutions through engineering excellence, advanced technology, and customer-focused execution.

Our Core Values

Quality - All Products Manufactured must pass stringent quality testing procedures, a standard inspection and testing plan is follow for all jobs Excellence in every design, detail, and delivery.

Reliability - Consistent performance and timely project completion.

Safety - Strict adherence to safety and compliance standards.

Capacity

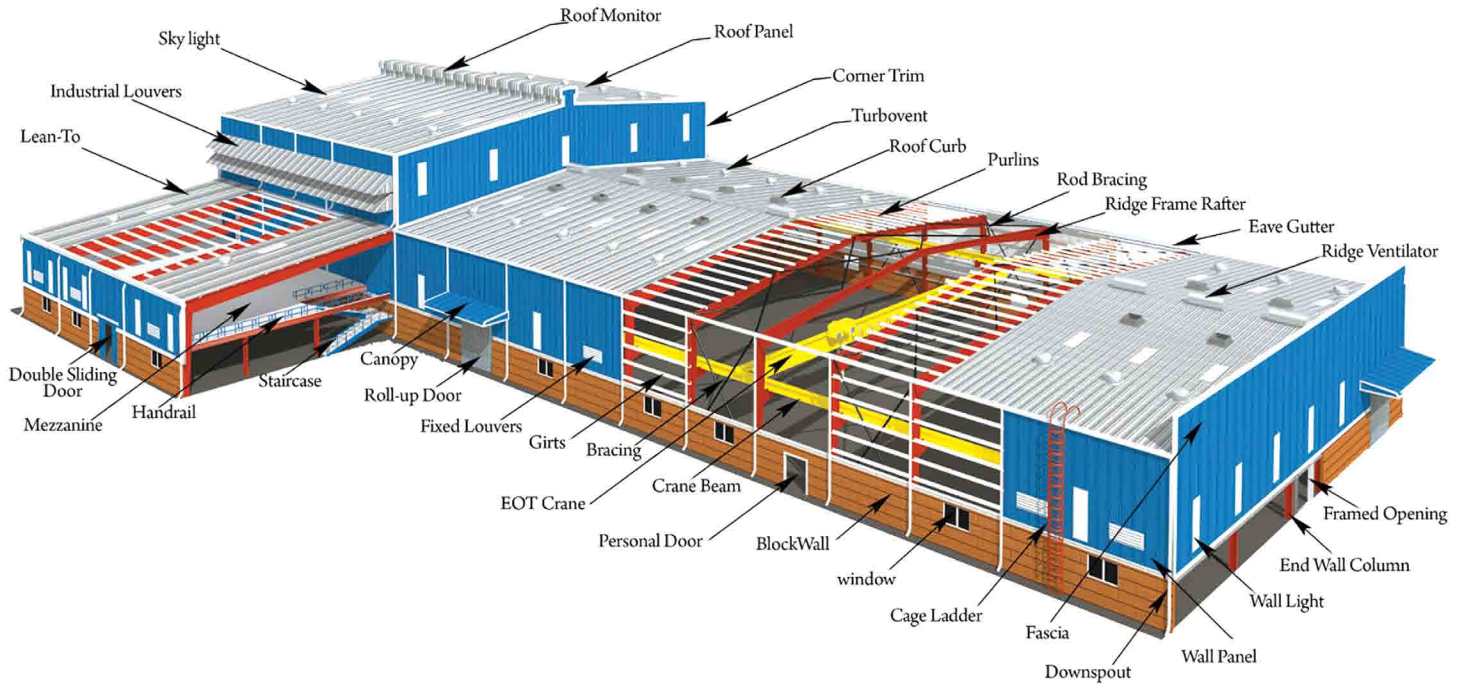

Technology - Cost Effective designs using TEKLA, STAD PRO and AUTO CAD.

Process - Centralized tracking for every phase of project execution to bring complete transparency.

Capacity - 25000 sft of fabrication area & 100000+ sft of stock holding area.

Details of PEB

APPLICATIONS OF PEB

Ware House

Shopping Mall

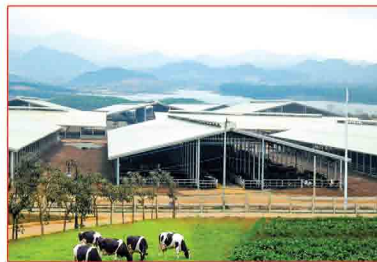

Industrial Work Shop

PEB Rice Mill

Air Port

Diary Farm

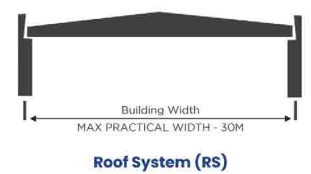

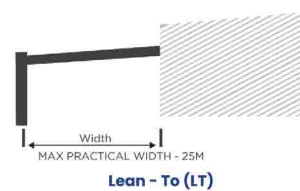

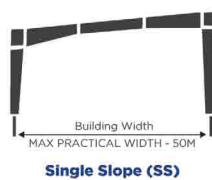

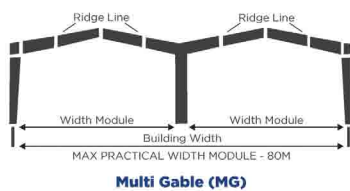

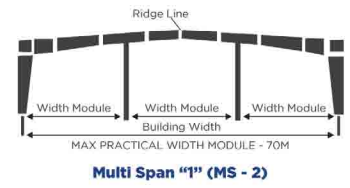

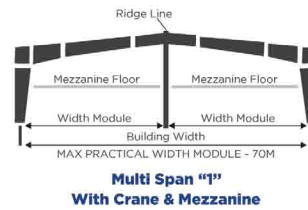

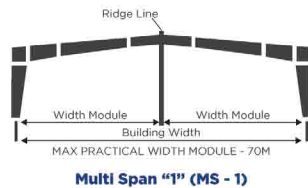

Heavy Industrial Structure

Convention Centre

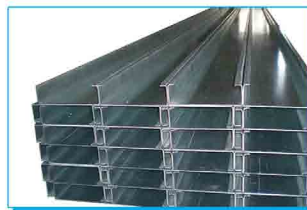

PRIMARY FRAMING SYSTEMS

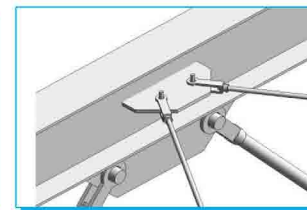

SECONDARY STRUCTURES

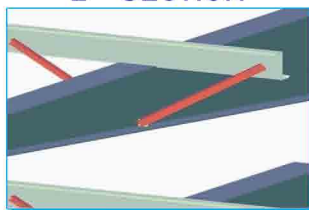

Z - SECTION

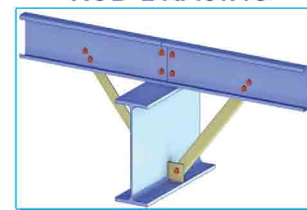

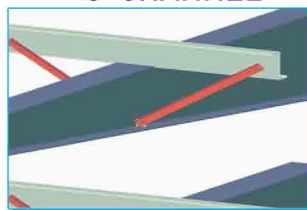

C-CHANNEL

ROD BRACING

FLANGE BRACING

BUILDING ACCESSORIES

Turbo Vents

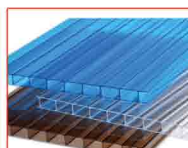

Ridge Vent

Galvalume Louvers

Glass Wool insulation

Poly Carbonate Sheets

Galvalume Gutters

Glass Wool Insulation

Pink Glass Wool Insulation

Poly Louvers

Roof Life Line

Decking Sheets

Bubble Type Insulation

Stair Case

XLPE Insulation

8.8 Grade Bolts

SD Screws

Our Manufacturing Facilities & Infrastructure

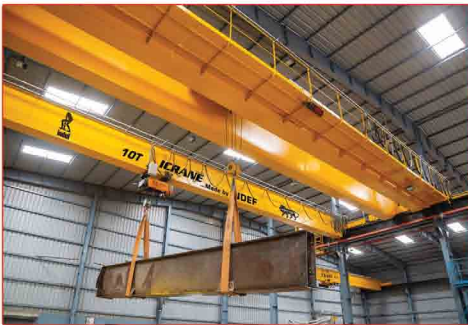

**PULL THROUGH
WELDING MACHINE**

**PLASMA CUTTING
MACHINE**

**THREADING
MACHINE**

EOT CRANE

COMPRESSOR

SHEETING MACHINE

AIR-LESS SPRAY MACHINE

HYDRAULIC PRESS

WEIGHBRIDGE
